☒ Notice to Comply with Requirements for Patent Applications Containing  
Nucleotide Sequence and/or Amino Acid Sequence Disclosures

--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Serial No. 09/169,793

Art Unit 1633

The instant application does not comply with the Sequence Rules (see 37 CFR §§ 1.821-1.825). See paper no. 2, mailed October 29, 1998. See the attached notice to comply with the sequence rules. Any response to this Office action must include those items listed on the notice to comply with the sequence rules in order to be completely responsive to this Office action. The period for response to the notice to comply with the sequence rules runs concurrently with the period to respond to the requirement for restriction.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 12, drawn to nucleic acid constructs, classified in class 536, subclasses 23.1 and 23.2.
- II. Claims 7-11, drawn to methods for producing single stranded DNA, classified in class 435, subclass 91.1.

The inventions are distinct, each from the other because the methods of Group II are not needed to produce the nucleic acid constructs of Group I. The nucleic acid constructs of Group I

Serial No. 09/169,793

Art Unit 1633

have uses other than in the methods of Group II. For example, the nucleic acid constructs of Group I have uses in affinity chromatography.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Wisner on February 16, 2000 to request an oral election to the above restriction requirement, but did not result in an election being made.

Certain papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Art Unit 1633 at (703) 308-4242. The faxing of such papers

Serial No. 09/169,793

must conform with the rules published in the Official Gazette,  
1156 OG 61 (November 16, 1993).

Any inquiry concerning this communication should be directed  
to J. Martinell at telephone number (703) 308-0296.
